

Königsbrücker Ausbildungsstätte gGmbH

Königsbrücker Ausbildungsstätte gGmbH

... is a state-of-the-art training center for occupations in the metal and electrical engineering sector;

... offers more than 60 years of experience in qualifying labour, as well as, in teaming up with local companies and institutions, to ensure an education that is based on the practical needs of the industry;

... is operating a regional online portal to match future apprentices with regional companies that offer apprenticeships, as well as,

... provides orientation for pupils in defining a suitable career path.

WE QUALIFY:

- apprentices who are sent off by currently more than 200 companies and public institutions in the region to gain further practical training,
- job seekers who are open for new challenges and
- employees of companies that want to enhance their knowledge in order to keep up with current developments in their fields.

OUR TRAINING PROGRAM CONSISTS OF:

- practical training of apprentices in more than 20 occupations in the metal and electrical engineering sector (e.g. systems mechanic, construction mechanic, mechatronic technician, electronic technician, cutting machine operator, warehouse clerk and so on)
- re-training and advanced training for adults,
- training and certifying of welders,
- training programmes on special technologies (e.g. CNC, CAD or SPS technology) and
- educational activities to convey realistic training content efficiently.
